INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference 03-899-A	FOR FURTHER ACTI	-	ee Form PCT/IPEA/416					
International application No. PCT/US2004/036418	international filing date (day 01.11.2004	/month/year)	Priority date (day/month/year) 30.10.2003					
International Patent Classification (IPC) or na C07C235/08, C07C233/18, C07D30	ational classification and IPC 3/36, C07C271/22, C07	C255/26, A61K31/1	65, A61P25/28					
Applicant ELAN PHARMACEUTICALS, INC.								
This report is the International pre Authority under Article 35 and train	isinition to the applicant a		International Preliminary E	xamining				
2. This REPORT consists of a total	of 7 sheets, including this	cover sheet.						
This was at leading accompanied by ANNEXES, comprising:								
1 in the determinant Rureau) a total of sheets, as follows.								
sheets of the description, claims and/or drawings which have been aniented and an area of the and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the and/or sheets containing rectifications).								
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the discosure in the international application as filed, as indicated in item 4 of Box No. I and the								
Supplemental box. b. Gent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) , containing a sequence listing and/or tables related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative instructions).								
This report contains indications in	relating to the following Ite	ms:						
☐ Box No. I Basis of the op	oinlon

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/US2004/036418

		No. III Non-establishment of licability	opi	nion with regard to noverty, inventive step and industrial				
1.	The	re questions whether the claimed invention appears to be novel, to involve an inventive step (to be non- vious), or to be industrially applicable have not been examined in respect of:						
		the entire international application	on,					
	Ø	claims Nos. 1-18 (all in part), 9-11 (with respect to industrial applicability)						
		because:						
	×	the said international application, or the said claims Nos. 9-11 (with respect to industrial applicability) relate to the following subject matter which does not require an international preliminary examination (specify):						
		see separate sheet						
		the description, claims or drawings (indicate particular elements below) or said claims Nos. are so unclear that no meaningful opinion could be formed (specify):						
	Ø	the claims, or said claims Nos. 1-18 (all in part) are so inadequately supported by the description that no meaningful opinion could be formed.						
	\boxtimes	no international search report has been established for the said claims Nos. 1-18 (all in part)						
		the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:						
		the written form		has not been furnished				
				does not comply with the standard				
		the computer readable form		has not been furnished				
				does not comply with the standard				
		the tables related to the nucleot not comply with the technical re	ide a quire	and/or amino acid sequence listing, if in computer readable form only, do ements provided for in Annex C- <i>bis</i> of the Administrative Instructions.				
		See separate sheet for further of	detai	ls				

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/US2004/036418

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N) Yes: Claims 1-13,17,18 No: Claims 14-16

Inventive step (IS) Yes: Claims 1-13,17,18

No: Claims 14-16

Industrial applicability (IA) Yes: Claims 1-8,12-18

No: Claims

2. Citations and explanations (Rule 70.7):

see separate sheet

Box No. VI Certain documents cited

1. Certain published documents (Rule 70.10)

and / or

2. Non-written disclosures (Rule 70.9)

see separate sheet

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/US2004/036418

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Present claims 1 - 18 relate to an extremely large number of possible compounds. Support within the meaning of Article 6 PCT and/or disclosure within the meaning of Article 5 PCT is to be found, however for only a small proportion of the compounds claimed. In the present case, the claims so lack support, and the application so lacks disclosure, that a meaningful search over the whole of the claimed scope is impossible. Consequently, the search has been carried out for those parts of the claims which appear to be supported and disclosed, namely those parts relating to the compounds according to the general formula (I) in which the residue R₁-Y- represents a 3,5-difluorobenzyl group. Consequently, a complete written opinion concerning the present application is limited to those parts of the claims for which a complete international search report was established (Rule 43bis.1(b) with reference to Rule 66.1(e) PCT). It should in particular be understood that any positive statement as to novelty and/or inventive step exclusively relates to said limited subject-matter.

Claims 9 - 11 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(I) PCT).

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following documents:

D1: WO 03/029169 A (ELAN PHARMACEUTICALS), 10 April 2003

D2: WO 03/006013 A (ELAN PHARMACEUTICALS), 23 January 2003

being novel with respect to the prior art.

1. Novelty

- 1.1 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 14 16 is not new in the sense of Article 33(2) PCT. The document D1 (see D1, page 82, line 8 page 83, line 23) discloses already the preparation of intermediates disclosed in claims 14 16.
- 1.2 The compounds disclosed in to claim 1 and claim 13 (intermediates) are not disclosed in the available prior art. The subject-matter of claims 1 13, 17 and 18 is considered as

2. Inventive Step

2.1 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 14 - 16 does not involve an inventive step in the sense of Article 33(3) PCT.

The subject-matter of claims 14 - 16 is not novel. Consequently, it cannot involve an inventive step either.

2.2 The subject-matter of claims 1 - 13, 17 and 18 does meet the criteria of Article 33(3) PCT.

In view of the documents D1 and D2, which can both be regarded as representing the closest prior art, the problem underlying the present application can be defined as providing further compounds with beta-secretase inhibiting activity, which are useful in the treatment of Alzheimer's disease and related diseases. To solve the problem the Applicant provides the compounds of the present application, which differ at least in two structural features from the most relevant prior art compounds described in the documents D1 and D2. The provision of the compounds according to claim 1 of the present application as further beta-secretase inhibitors is thus not obvious with regard to the prior art. Consequently, the provision of the compounds of claim 1, their preparation (claim 12) and the intermediates disclosed in claim 13 involve an inventive step.

3. Industrial Applicability

- 3.1 The subject-matter of claims 1 8 and 12 to 13 is industrial applicable.
- 3.2 For the assessment of the present claims 9 11 on the question whether they are

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/US2004/036418

industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.
